

## MHA Mini Hanger

*The MHA is a galvanised mini joist hanger suitable for use with regularised timber, rough sawn timber, I-Joists and LVL. Ideally suited for small timber sections and timber members; such as trimmers and ceiling joists*

### Features

#### Material

**Pre-galvanised mild steel**

Mini Hanger

## Installation

### INSTALLATION NOTES

For solid header fill all nail holes. For I-Joist headers fill the bottom two nail holes on each side.

- Hanger depth should be at least 60% of carried member depth to prevent rotation. If less than 60%, then additional lateral restraint to the top of the carried member is required.

#### Solid Headers

Install 5 header nails per side [A] and install 3 joist nails per side [B]. Fasteners as stated in the relevant performance tables.

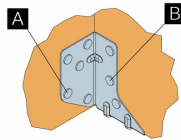

#### I-Joist Headers

For I-joist headers, 2 hangers are required; one top and one bottom

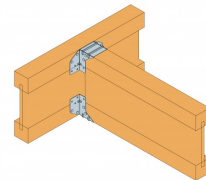

Fill the bottom 2 nail holes on each side; 2 header nails per side [C] and 2 joist nails per side [D]
